What is the difference between retiring on December 31st vs. January 1st?

The difference between these two dates is only one day, but it can have a big effect on your retirement benefits over time. Your first Cost of Living Adjustment (COLA) is paid on May 1st of the second calendar year after you retire, and annually after that.

For example, a December 31, 2023 retirement date has a COLA that will go into effect May 2025.

If your retirement date is January 1, 2024, your COLA will go into effect May 2026.

For a December 31, 2023 retirement date, your <u>last day of work</u> must be December 30, 2023. For a January 1, 2024 retirement date, your <u>last day of work</u> must be December 31, 2023
