PMI Authorized Training Partner (ATP) Program Update

PMI Authorized Training Partner (ATP) Update

We are excited to announce Skillsoft is a PMI "Authorized Training Partner" (ATP), approved by PMI to provide instruction for both PDUs and PMP Exam Prep.

What does this mean?

- Skillsoft's PMP Certification Prep training is **only available only through Skillsoft's Bootcamps**; virtual, instructor-led training. These bootcamps are taught by PMP-certified instructors and include PMI-sourced content enhanced by Skillsoft. These PMP Certification Bootcamps are planned as a series of sessions that collectively provide the 35 instructional hours required by PMI.
- Skillsoft's on-demand project management course content will continue to be available, and regularly updated as in the past, to be used as additional reference/study materials.
- PDU content is not changing, although some course titles or descriptions may be slightly adjusted.
- Skillsoft's on-demand PMP content is no longer approved for use for PMP Certification prep. However, the courses included within the PMP channel are still available for reference or for review before you sit for your PMP exam.

Why use Skillsoft's PMP Certification Training? Skillsoft's PMI bootcamps have consistently enjoyed a remarkably high NPS of 80+. They are included in the price of subscriptions, with a special Test Prep capstone session for those learners seeking to qualify for PMP certification.

Note: PMP Certification Test Prep candidates are required by PMI to purchase a "Learner Kit." These kits are available from Skillsoft for $110.

Contact your Skillsoft account team for additional information.
