

Passport Program: Assessment Chart

An Assessment Chart can be used to evaluate traveler skill level at the beginning, middle and end of the travel experience. A sample chart has been provided for your use.

Instructions: Please update the chart to show the traveler name and skills/tasks/knowledge that are being assessed. Once updated, indicate the skill level to the right of each skill listed. For example, at the beginning of the travel experience, the traveler might be un-trained in all areas and would therefore be assessed at a "0" skill level for each area.

ASSESSMENT LEGEND
