How to find a doctor or hospital

Finding doctors, medical groups and facilities in your UnitedHealthcare SignatureValue® Alliance and Harmony HMO networks is important—because staying in the network gives you the highest level of coverage.

Follow these steps to find nearby care on uhc.com/CalPERS

1 Visit **uhc.com/CalPERS > Search for a Provider**

2 Select the **SignatureValue Alliance or Harmony HMO Network** to find a doctor or hospital

3 On the next page,
- To find urgent care facilities, select **View CA Medical Group and Urgent Care Information**
- To find doctors and hospitals, select **Continue**

4 If you know the doctor's name or specialty, or the name of the facility, clinic or medical group, use the search bar to find nearby providers

5 If you aren't searching for a specific provider or place, select **People > Primary Care**

6 Select **All Primary Care Providers*** to see a list of doctors in your ZIP code area

7 Select the **doctor's name** to find additional information—such as their address, phone number, hospital affiliation, reviews and whether they're accepting new patients

> **Make note of doctor's Provider ID number,** which is listed under the Locations tab. You'll need it after you enroll in the Alliance or Harmony HMO plan.
